An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Zborovsky on 3/4/05.

The application has been amended as follows: in claim 16, last line, --- , wherein said resilient time servo-component is an elastic rubber member, a hydraulic spring or a pneumatic spring and said means for clamping said at least one weight-bearing element comprising inclined bevels pivotably mounted in said housing and forming an interior space widening downward; cotters positioned on opposite sides of said at least one weight-bearing element in between said inclined bevels; rollers arranged movably, but securably, between said cotters and said inclined bevels in said interior space; wherein said inclined bevels are connected to said resilient time servo-component so that said inclined bevels respond to said time servo-component when said time servo-component acts on said means for clamping --- has been inserted after "expires"  
claims 17,18 and 23 have been canceled.

In the abstract; last line, ) has been inserted after "unweighted."

The following is an examiner's statement of reasons for allowance: the prior art does not show a means for clamping comprising the claimed pivotable bevels, cotters with rollers arranged movably between the cotters and pivotable bevels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
